TECHNICAL SKILLS

Coding: JavaScript, Java, Swift, nodeJS, jQuery, React, HTML, CSS, XML

Technologies/Environments: MySQL, MongoDB, Sequelize, Mongoose, Express, Mocha, Chai, Axios, Morgan, Maven, Git, WSL (Bash), Linux, Domo, Swing, Microsoft Power BI, Microsoft Project

EDUCATION

Georgia Institute of Technology   *Atlanta, GA*

Full-Stack Web Development Certificate   Oct 2019

Coursework: a full-time, hands-on programming course building full-stack web applications using JavaScript and associated in-demand web technologies. We learned to program everything from front-end design, to DOM manipulation, to routing, to setting up and deploying servers, to database structure and design.

Georgia State University   *Atlanta, GA*

Bachelor of Business Administration   May 2019   **GPA:** 3.7

Major: *Computer Information Systems*

- *Area of Focus:* Mobile Application Development
- *Awards:* Magna Cum Laude
- *Honors Societies:* Beta Sigma Gamma

Coursework: Mobile Application Development (Android, iOS, Web), Desktop Application Development (Java), Introduction to Programming (Java), Database Management, Systems Analysis, Networking and Real-World Cybersecurity, Managing IT Projects

EXPERIENCE

good2grow, Atlanta, GA

Business Intelligence Programmer *(January 2018 – Current)*

- Built dataflows using DOMO that transformed data from raw data up to the point where analysts could implement the data into visual representations, and accounting team could use data to have a dynamic look at where we were at in comparison to forecasts.
- Queried incoming data using MySQL (in Domo) and MS SQL Server (outside of Domo) to solve complex mapping using applied business logic and technical skills.

Shiplify, Atlanta, GA

Data Intern *(January 2016 – September 2016)*

- Geolocated shipping locations for logistics software using a variety of data sources.
- Assisted in the implementation of machine learning to compile data more effectively and efficiently.
